

Fishing At Moulin De Guinche
Re-Stocking of the Moulin Lake
March 2012

After 4 years spent improving the lake quality we re-stocked the Moulin's Lake in March 2012. Although there were already some huge carp in the lake we decided to add a few more carp and a further 21 Common and Mirror carp were introduced.

We are sure they will provide sport for all of the anglers fishing at the Moulin this year and we will certainly have a go at catching a few ourselves on our next visit!

So for those that say there's nothing in there then sorry there are no more excuses!

Planned for the end of 2012 will be the netting out of the lake with all fish being counted and checked with removal of some of the many smaller silver fish and with a few even larger Carp added for next year!

For all of those trying to catch the fish please do look after any that are caught and follow the hints, tips and rules. Please do send us photos of any caught for our website!
